

## Prelac® 38-15

Prelac 38-15 is a skimmed milk powder replacer. The concentrate contains a high level of protein and carbohydrates, including lactose. Prelac 38-15 could be included in the creep, weaner and starter diet of piglets because of the highly digestible protein and lactose content. In the formulation Prelac 38-15 can replace (partly) crude soybean meal or other low digestible protein sources. The need of dairy in a recipe can be lowered with Prelac 38-15 as well. Levels up to 20% can be included in a piglet diet. Prelac 38-15 is especially interesting for home mixers because of the combination of a high protein level and lactose inclusion.

<b>Recipe code</b>	:	6575500 (14.16)
<b>Description</b>	:	A skimmed milk powder replacer
<b>Application</b>	:	Complementary feed for piglets
<b>Advised inclusion rate</b>	:	Creep: ≥20%; Weaner: 10 - 20%; Starter: 5 - 10%
<b>Appearance</b>	:	Creamy colored powder
<b>Product specification</b>	:
